SZ - 17 | ALCOVA LOUNGE CHAIR

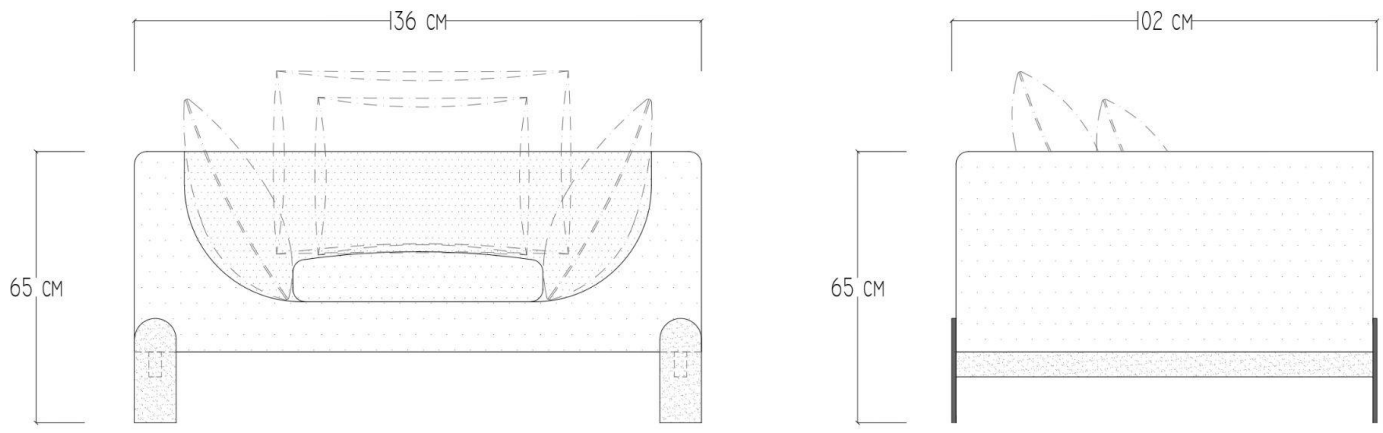
SZ - 17 | ALCOVA LOUNGE CHAIR

by Sebastiano Zilio

For Alcova a richly decorated, intimate and comfortable environment is identified, these were the guidelines for designing this new lounge chair.

Alcova was designed to provide a chair solution that could meet the various style needs, with a strong reference to the world of fashion and proposing upholstery solutions that combine leather with fabric, while to increase comfort, the armrests have been designed with a particular curvature to accommodate a voluminous cushion bounded by an elegant leather cord.

The rich structural details, such as the internal part of the body upholstered in leather that embraces the seats and backrests, and the purely aesthetic details, such as the visible stitching that mark the transition from leather to fabric, connote its strong personality and enhance its originality of the design of this chair. The careful finishing of all the manufacturing details best expresses the consolidated sartorial mastery achieved by the Blackwood craftsmen.



Available Materials

Artisan Brass Metal | Fabric & Leather

Data	Width (cm / in)	Depth (cm / in)	Height (cm / in)
